# Cylinder Fleet Manager (CFM)

**1** **Cylinder Stock List**

- Create a cylinder stock list with the ability to keep records on your entire cylinder fleet.
- Add any type of cylinder whether product, recovery or receiver or service gas cylinders
- Add cylinders from any suppliers, not just A-Gas
- Collect and return cylinders using the Track Cylinders function on the GTO app.

**2** **Cylinder and Gas Tracking**

- Add, transfer and return cylinders by engineer
- Each cylinder movement is stored with a date and logged against engineers
- Provides accountability: avoid 'lost' cylinders
- Quickly check the quantity of remaining product left in each cylinder to identify whether any need to be returned to the wholesaler
- Have better control of your cylinder stock and gas usage

**Track Cylinders**

**3** **Rental Cost Control**

- Manage your cylinder rental costs with our easy to use **Rental Status** function.
- Simply sign onto your CFM to see which of your cylinders are incurring a charge and organise for them to be returned in order of priority
- Calculate your expected cylinder charges months in advance to avoid unexpected surprises
