

Cylinder Fleet Manager (CFM): Example Screen

Display History:

- Real time information and visibility of cylinder fleet
- Display current or current and returned stock

Charge As Of:

- Indicates the rental information that is being displayed for that specific date.
- The date can be moved forwards or backwards to see what status your cylinders will be in a month down the line or historically

Supplier:

- Add cylinders from any suppliers, not just A-Gas

Free Duration and Rental Value:

- Enter your specific supplier rental terms

Cylinder	Cylinder Type	Product	Cyl Weight (kg)	Rem Product (kg)	Supplier	Wholesaler	Location	Free Period	Free Duration	Rental Value	Rental Start Date	Pickup Date	Rental Status

Cylinder Number and Type:

- Track any cylinder number and any cylinder type

Remaining Product (kg):

- The quantity of reaming product in a cylinder is calculated by:
Cylinder Start Weight (kg) – Quantity of gas entered into GTO app
- This allows office workers to quickly check how much product is left in a cylinder, providing better stock control with all their cylinder information in one location

Rental Status:

- This column allows office workers to quickly check what rental status their cylinders are in leading to better cost control:
 - No Charge:** cylinder is within its free rental period and isn't incurring rental charges
 - Charge Due:** cylinder is coming towards the end of its free rental period and will start to incur charges in under 2 weeks (or the time period you select). Consider returning cylinder soon
 - Charge:** cylinder is currently incurring rental charges and requires returning
 - Unknown:** cylinder has been added by a mobile device and the rental terms have not yet been entered
