

Gas-Trak Online

*F-Gas Reporting and
Cylinder Tracking Solution*

TOP TEN BENEFITS

one

Easy to use:

Navigate round the app using the icon buttons or menu bar on the home screen. Need help? Utilise the help documents provided or contact the dedicated GTO support team: support@gastrakonline.com

two

F-Gas compliance:

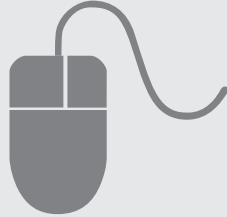

Comply with F-Gas Regulations by using the GWP calculator tool to convert your F-Gas refrigerant usage into CO₂ equivalent.

three

Real-time reporting:

Use the free F-Gas log book, or subscribe to the enhanced service to report your F-Gas usage electronically, at a click of a button.

four

Cylinder tracking:

Tracking a fleet of cylinders across multiple engineers can be a time-consuming and complex task. Storing cylinder data in GTO makes cylinder management easy.

five

Cost efficiency:

Reduce the time spent and costs incurred in reporting when compared to the use of manual log books. Replace time-consuming paperwork with a computerised F-Gas reporting solution.

six

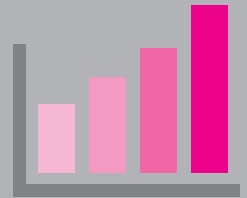

Performance indicators:

Our enhanced service provides the ability to analyse performance via a reporting dashboard, whether it's engineer performance, popular products or 'problem' sites.

seven

Customer experience:

Efficient and accurate F-Gas reporting ensures you have satisfied customers who are F-Gas compliant.

eight

Cross platform compatibility:

GTO is available on iOS and Android, with Windows due to follow shortly. This is a first in the industry, allowing GTO to provide an F-Gas reporting solution regardless of your operating platform.

nine

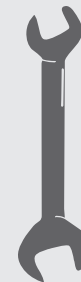

Data storage and security:

Working in a location with little or no internet connection? The app will temporarily store your data and synchronise once connectivity is available. No data is transmitted without being encrypted. As a result, your data cannot be tampered with or read by third parties.

ten

Designed, developed and maintained by industry experts:

GTO has been developed in-house giving the ability to make amendments, customise reports and integrate with external systems.
