Your Cylinder Management Solution

Complete with free mobile app and access to desktop web portal

Cylinder Tracking:
It really is that simple!

www.gastrakonline.com

With GTO™, managing your F-Gas refrigerant usage and cylinder fleet has never been easier. Complete with handy features, GTO™ is a quick and simple F-Gas reporting and cylinder management solution which can be used on the move. GTO™ comes complete with two interconnecting elements: The Mobile App and The Desktop Web Portal.

Web Portal: Acting as the central control point, the Desktop Web Portal enables users to manage their account, customer records, job lists and cylinder fleet. Data can be viewed in one place, producing useful analysis and cylinder tracking functionality.

App: Available on Android and iOS, the GTO™ App is a great tool for engineers to enter data whilst on the move. The App automatically syncs with the Web Portal, ensuring real-time data is available to the office at any point.

Features:
- ✔ **GWP calculator**
- ✔ **Customer data**
- ✔ **Active job lists and historical records**
- ✔ **Ability to upload large amounts of data**
- ✔ **Cylinder Fleet Manager (CFM)**
- ✔ **Cylinder rental cost control**
- ✔ **Cylinder tracking**
- ✔ **Cylinder stock list**
- ✔ **F-Gas reporting**
- ✔ **Barcode Reader**

Let's take a look in detail:

Customers

Store customer, site and equipment data in GTO™ ready to create new jobs, edit existing ones and keep a log of completed work.

Jobs

The job management function allows office-based employees to manage jobs for their field-based team through one Web Portal. Jobs can then be allocated to the relevant engineer and will appear in their App.
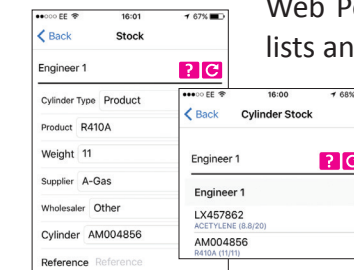

Track Cylinders

Tracking a fleet of cylinders across multiple engineers can be a time-consuming and complex task. Storing cylinder data in GTO™ makes cylinder management easy and provides a great tool for controlling your rental costs from multiple suppliers.

GTO Web Portal
Cylinder Fleet Manager (CFM)

| Cylinder Number	Cylinder Type	Product	Cylinder Weight	Remaining Product	Supplier	Wholesaler	Current Location
LX482763	Product	R404A	13 kg	12.5 kg	A-Gas	Bens	Ali

LX457862	No Charge
RS968746	Charge Due
AR006478	Charge

Cylinder Stock

View your cylinder stock list on your mobile device, check the remaining product in a cylinder and transfer cylinders between engineers. Use the Web Portal to access cylinder lists and usage by engineer.

Barcode Reader

With the ability to scan barcodes, GTO™ can help reduce those dreaded cylinder number errors; simply hold the scanner to the barcode and let the phone do the work. Cylinders added in the App will appear in your Web Portal.

GWP Calculator

Under the F-Gas Regulations, calculating the CO_2 equivalent is required. Don't know how to do this? GTO™ has a GWP calculator that will do this for you and advise of the required leak checking frequency.

Reporting

Don't forget to log into your Web Portal for full reporting functionality!
